Evening Brief

Date: Thursday August 8th, 2019

Weather Summary

High Risk for Wind on Friday and Saturday

On Friday, the main concern shifts to the potential for elevated winds across eastern and southern Nevada and along the Sierra Front. An approaching cold front will bring dry air and elevated winds to the area beginning Friday and cooler weather this weekend. Thunderstorms may continue on Friday over parts of far northern Nevada into Idaho and across parts of Utah before the drier air moves in. Winds may increase further on Saturday across Nevada and Utah and into southern Idaho. **High Risk** has been issued for gusty winds/low RH especially in areas where there are ongoing fires and expected additional lightning.

The cold front will also bring a better chance of a wetting rain to the higher elevations of central Idaho on Saturday. Warm, dry air returns to the Great Basin for late in the weekend and into next week.

Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	3	Light Initial Attack Activity
National	3	New Fires and Acres: 36 fires 3,021 acres; 215 acres large fire growth

Great Basin Fuels/Fire Potential

Sagebrush live fuel moisture values have dropped to near seasonal normals across much of the geographic area and will contribute to fire growth at most lower elevations.

Anticipated showers and cooler temperatures across the northern half of the geographic area will temporarily reduce overall fire potential. A long term drying trend appears to be on the horizon which will allow fuels to continue drying and increase fire potential region wide once again.

Resources:

Aviation within the Great Basin

- 1 VLAT's, 5 LATs, 4 CL-415
- 28 SEATs, 3 Fire Bosses
- 9 Type 1 Helicopters / 9 Committed
- 6 Type 2 Helicopters / 6 Committed
- 9 Type 3 Helicopters

Crews Committed within the Great Basin

- 25 IHCs Committed / 1 Available
- 40 T-2 IAs Committed / 0 Available
